ASSIST

Who We Are

Vend Assist is your one-stop, quality solution for all your vending maintenance and servicing requirements.

Through our parent company, GVS Assist, we have provided complete technical support to our clients since the 1920's.

Vend Assist offers quality service for all types of vending solutions, from drinks dispensers, hot and cold food machines, water coolers and bespoke housing - all complimented by our unparalleled standards of technical service.

Our technical expertise ensures that both you and your clients are in the best hands possible.

We are proud holders of the ISO 9001 Quality Management Standard.

Selecting the Right Partner for your Business is Key

Ensuring your service partner can support you across all aspects of your business gives you the confidence to relax in the knowledge that your customers are being looked after. Vend Assist believes in taking your customer support to a new dimension.

Whether it is out in the field or within our technical facility, the attention to detail given when repairing equipment is of prime importance to us. Our capabilities cover a broad range of manufacturers, equipment types and specialist areas.

Environment

GVS are members of the Automatic Vending Association (AVA), which funds the Save-A-Cup industry led scheme to collect and recycle plastic vending cups. The scheme is environmentally friendly and helps us all to minimise waste.

All GVS supplied equipment can be filled with Fairtrade products. The Fairtrade mark is an independent consumer label which appears on products as an assurance that disadvantaged producers in the developing world are getting a better financial deal.

GVS is a major supplier of Kenco equipment. Kenco produces Rainforest Alliance coffee, which can be used in any of its range, including the Singles machine.

We have a significant number of dual-fuel cars in our fleet.

We promote machines from manufacturers who have the ISO 14001 accreditation.

Independence

At Vend Assist we pride ourselves in being truly independent – our only focus is on ensuring your equipment is in perfect condition at all times. This freedom from machine manufacturers means that if purchasing a machine it leaves you free to choose a range of equipment that's right for you and your market. As experts in our field we are of course able to advise you if you wish.

We have a huge depth of experience. Our team will work closely with many of the equipment manufacturers, to enable us to work closely with you. So, whatever your requirement we can provide a viable, cost effective and bespoke package that is right for you. As our customer, our goal is to help you serve your customers better.

Truly National Service Coverage

Via a network of more than 150 of our very own field-based engineers and 80 support staff, we provide a truly national coverage throughout the UK.

We have extensive capabilities, both field and Head Office based to provide a complete support package across logistics, PDI, field engineering, refurbishment and management information.

We have two large warehouse facilities in the UK, enabling us to get stock to all areas of the UK easily and allowing us to hold storage ready for immediate despatch.
